About Us

Malaysia Technology Transformation & Creativity (MTTC) College, the esteemed institution specialising in Architecture, Engineering, and Construction (AEC), is proudly registered with the Department of Skills Development (JPK) under the Ministry of Human Resources in Malaysia.

Since 2013, MTTC College has fostered strong collaborations with key Malaysian government-driven departments such as MDec and CIDB. Through these partnerships, we have actively promoted and provided comprehensive training in Building Information Modeling (BIM). MTTC College offers a unique vocational pathway that empowers students to pursue their dreams on a global scale, particularly in the United Kingdom upon graduation.

Our specialised certifications enable the seamless integration of cutting-edge technologies, while instilling essential skills and knowledge into our programs.

By doing so, we strive to nurture highly-skilled talents for the design and building construction industry in our country.
